PROFILE

I am a Paraguayan oral rehabilitation specialist and implantologist with over a decade of clinical experience across Paraguay, Brazil and the United Arab Emirates. With international experience and a DHA license in Dubai, my practice focuses on full-mouth rehabilitations, porcelain veneers, implant-supported prosthetics and minimally invasive aesthetic dentistry — combining digital workflows with hand-crafted detail to deliver natural, long-lasting results.

Trained at the Universidad Nacional de Asunción and at the world-renowned Faculdade de Odontologia de Bauru — Universidade de São Paulo, my approach blends biological understanding, occlusal precision and the latest in digital workflows. I believe each restoration must look natural, function harmoniously, and last for years — and that the patient should be a partner in every decision along the way.
